- Waratah 2.5mm tie wire
- JVA bullnose porcelain strain insulators
- Gallagher steel post pin lock insulators
- Rotech tie back assembly's used with the foot plate raised up on a concrete slab

Client Expectations and Feedback

Client (My Father)

Was very happy with how the fences all turned out, really liked the simplicity of the design with 3 barbs in the fence and having 2 hot wires to keep the cattle off the fence, making sure that whenever he was able to turn off the bottom wire in case of dry times, but still able to keep the top one hot at all times. Having the all steel end assembly's with the tie back really impressed my dad on how they worked and he really loved how you can come back and adjust them, most of this country is black clay and shifts like butter in a microwave so being able to have a solid end assembly's was amazing to him.

Ownership and promotion of entry information and images

I agree

Date the project was completed

1st of November 2024 - 10th of January 2025

More information

Hi!

My names Jeremy, I am 15 years old, live in the upper hunter and have taken a real interest in fencing!

I do fencing on my dads property and thought that it'd be about time that I would show my workmanship, I also feel that it is a great achievement, especially at my age to be able to go out, slash a line, put strainers in, run a sight wire, ram post in, strain more wire and tie them onto the post, I believe it's an art anyone of any age can do and I encourage all that read this to give it a go! Yes there are challenges like facing the heat and cutting your hands 😂 but at the end of the day I believe fencing is one of the most rewarding jobs you can do, you can see the work for what you have done and at the end of the day, if built right, should last quite a while, hopefully you won't have to go back and fix it again 😂 I really love tying my knots nice and neat and making sure i can snap that wire off so i don't leave any sharp edges like my dad taught me, just use the bolt cutters and the wire twister 😂 I would also like to thank my 2 mates, Archie Constable and Will Whalan, for when they come out and help me with the fencing, couldn't do it without them and honestly probably wouldn't have a straight back without them 😂 Theres plenty more to do, i've nearly done 3kms and are expecting a few more k's to come out of it!

Thanks!

Jeremy and the Jezrural Team ❤️🐼
